

ProfileMaster

Machining methods

Machining methods - radial application 90°

Drilling into solid material with flat bottom holes

Boring applications

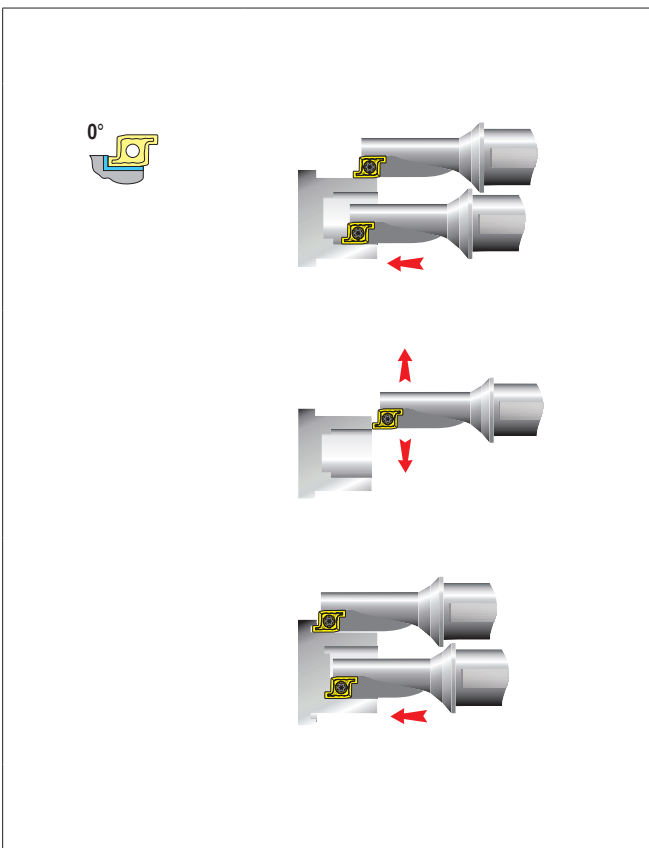

External turning applications

Internal turning applications

Turning of face profiles

External radial grooving

Internal radial grooving

Machining methods - radial application 0°

External turning applications

Boring applications

Turning of face profiles

External radial grooving

Internal radial grooving

When changing from internal to external machining, reverse direction of rotation
